Freight Protection  
Services

All materials can be glued to the walls of the crate or wrapped around the cargo and/or outside of the crate to ensure protection

## Fibreen Lining

Heavy duty moisture proof case liners, interleaving and wrapping.  
Two direction reinforcing fibres for tear and puncture resistance.  
Bitumen core assists self seal around staples  
Condensation resistant surface

## Shrink Wrap (PVC)

Biaxially orientated and enhanced film.  
Strong, shape conforming and tamper evident.  
Highest clarity and gloss properties in its class.  
Seals well on all systems with excellent puncture resistance and elongation properties.

## Vacuum Pack

Highest quality aluminum foils (Trilaminate).  
Preferred packing material for export purposes and sea worthiness.  
Maintains the humidity level below 40% inside the package.  
Protects against: Oxygen & water permeation  
Physical, biological & ultra violet radiation  
Acids and alkalies  
Oil and grease damages

## VCI Film

Embedded VCI inhibitors are corrosion protection films.  
Continuously protects the parts wrapped in these films.  
Transparent and perfectly suited to automated packing equipment.  
Combines outstanding corrosion protection with simple and clean application.

## Desiccant Bags

Cost-efficient, moisture-absorbing clay packets for industrial packing.  
Protects the contents of a container during shipment and storage.  
Virtually add no weight or size to packaging.
